

I am pleased to present to you the February 1, 2019, issue of Global Health Online journal.

We start this issue with an article by Mr Jadoopat on Andexanet alfa, an agent for over-anticoagulant reversal that has recently appeared on the market. This is followed by Dr. Dallas Smith, currently working as a Peace Corps volunteer in Cambodia, who provides a pharmacist's perspectives on challenges facing the health care professionals in combating tuberculosis.

In third article, Dikta Thapa a Nepalese student who went to India to study PharmD shares her life's journey to become a pharmacist. Next two articles by the physical therapy faculty members at the University of Findlay sheds light on how appropriate use of technology can be a low cost alternative to provide cultural sensitivity, Weaver & Koehler, followed by Dr.

George describing the many critical factors one needs to consider for teaching in a resource poor setting, her own experience teaching a physical therapy course in Haiti.

Final article in this issue is by Dr. Nagavi describing how he converted four decades of his teaching experience to start HESDAR center in Mysuru, India, whose mission is to improve faculty quality by strengthening their skills in various aspects of teaching.

Hope each one of you finds something of value in this issue and certainly will consider contributing and sharing your own expertise in any aspect of global health to future issues.

Sincerely,
M. Chandra Sekar, R.Ph., Ph.D., FAPhA
